

predictive information be used against me or my family? Particularly when I am currently healthy and, in fact, may never develop the illness? I think the American public has answered quite clearly, "no."

As a physician I believe in preventive medicine to avert illness for patients. Similarly, as a policymaker, I believe in "preventive legislation" in this case—to avert widespread discrimination by stepping in now—before genetic information is used in certain health insurance practices and before genetic technologies are used in routine medical practice.

Finally, I believe that, in order to fully address genetic discrimination, we must tackle comprehensive legislation on the confidentiality of medical records—legislation that encompasses all of our health information. We must examine who should have access to sensitive health information and to whom it should be disclosed. As this important debate continues in the 105th Congress, I am committed to ensuring that we craft legislation that protects patient confidentiality, fosters medical research, and maintains a dynamic health care system.

Only with these measures can we ensure that knowledge about our genetic heritage will be used to improve our health—and not force us to hide in fear that this information will cause us harm.

I encourage my Senate colleagues to join me in examining these issues and moving forward in the coming months on these critical pieces of legislation. ●

TRIBUTE TO CAPT. FREDRIC G. LEEDER, USN—PUBLIC AFFAIRS OFFICER

● Mr. GLENN. Mr. President, I rise today to commend Capt. Frederic G. Leeder, USN, upon his retirement from the United States Navy, after 28 years of distinguished and dedicated service to our nation.

Captain Leeder is a native son of Ohio and graduated from Ohio State University with a degree in journalism. Following his graduation from college, Captain Leeder was commissioned as an Ensign. After his graduation from the officers' program at the Defense Department's Information School, he then assumed a variety of public-affairs assignments overseas and state-side. His tours of duty included a North Atlantic Treaty Organization staff assignment and four joint-service assignments.

Most recently, Captain Leeder served as Staff Director for Public Affairs at Headquarters, Defense Logistics Agency (DLA) in Alexandria, Virginia. During his three years at DLA as principal spokesperson, Captain Leeder demonstrated unbounded stamina, keen insight, and exemplary professionalism. Possessing exceptional skill, foresight and composure, Captain Leeder dealt with representatives of the print and electronic media, engaging them on his

terms. In just one example, last fall he competently worked with investigative reporters from a prominent news magazine and a major television network to ensure accuracy and fairness of nationwide reporting on a sensitive issue having significant national security implications. With his intelligent foresight and strong voice of reason, Captain Leeder, advised three different DLA directors, each from a different service I might add, on how to navigate through the often perilous waters of media and community relations.

Captain Leeder succeeded in striking that delicate balance of ensuring the American public's right to know and protecting the public interest throughout his career. An accomplished communicator, he truly has earned the gratitude of thousands of military families that have found comfort and reassurance in his words when loved ones serving on distant seas and shores have been in harm's way. Captain Leeder has served his country for 28 years with valor, loyalty, and integrity, winning the personal and professional respect of all who come in contact with him. Captain Fred Leeder is a master of his craft.

On the occasion of Captain Leeder's retirement from the U.S. Navy, I offer my congratulations and thanks to this esteemed son of the Buckeye state, and wish him well in his future pursuits. ●

TRIBUTE TO ROBERT A. STARR

● Mr. JEFFORDS. Mr. President, I rise today to pay tribute to Robert A. Starr, Chair of the Vermont House Agriculture Committee and true Vermonter. I pay this tribute in recognition of Mr. Starr's unyielding support for the Northeast Dairy Compact, which on August 20, 1997, provides the first over-order payments so desperately needed by Vermont's dairy farmers.

"Bobby", as he is known far and wide throughout Vermont, has given lifelong public service to the Vermont agricultural community. Raised on a dairy farm during and after the Second World War, knowledge of hard times and a capacity for hard-bitten labor were ingrained in Bobby, traits which continue to distinguish the character of our hill farmers. After schooling at Vermont Technical College, Bobby followed the lead of his grandfather and became a member of the Vermont House of Representatives in 1979.

Bobby became a member of the House Agriculture Committee his first year, and has been there ever since. He became Chair in 1987, and has sponsored and provided leadership on a host of initiatives to promote the interests of Vermont agriculture. Bobby has lent his leadership to the variety of Vermont's agricultural pursuits, but it is the dairy industry which has remained at the heart of his vision. Certainly Bobby's upbringing and his strong dairy farm constituency provide the foundation of his knowledge and com-

mitment to the interests of the State's dairy farmers. Yet his vision is broader than just his home district, and indeed has expanded beyond the borders of Vermont to all of New England.

It is this unique expansive vision which spawned the dairy compact. Many of us in this body are intimately familiar with the dairy compact, yet few of us may know that the dairy compact was originally sponsored by Bobby Starr in the Vermont Legislature in 1989.

Few initiatives in my memory have sparked such a vigorous policy debate as the dairy compact. I am proud to have sponsored the compact on behalf of all by colleagues from the New England delegation. Adoption of the compact could not have happened without their hard work here in Congress, and without the years of dedicated work of a veritable army of compact supporters from throughout New England.

In all, the compact reflects the true spirit of commitment to our dairy farmers. The compact's first payment is a tribute to the hard work and the tireless commitment of Bobby Starr. ●

WV AMERICORPS PROJECTS

● Mr. ROCKEFELLER. Mr. President, I rise today to congratulate the West Virginia Americorps Program for their outstanding service and accomplishments. Currently, 500 Americorps members work at nearly 100 sites throughout West Virginia. Americorps programs strive to extend and promote education for children of all socioeconomic backgrounds and to fulfill basic needs, such as, food, shelter, and health care, for West Virginians. By working together with the community, the members of Americorps search for solutions to improve the quality of life and expand opportunities for individuals who are less fortunate.

Helping individuals become more independent and self-sufficient are goals of Americorps. To help people with multiple sclerosis, the West Virginia chapter of the National Multiple Sclerosis Society and Americorps members provide friendly home visits, organize peer support groups, and help them with their daily chores.

The Energy Express Americorps opens new doors and expands the possibilities for children of West Virginia. This 6-week summer learning program provides nutritious meals, a safe learning environment, and positive role models. While developing a strong relationship between students and mentors, the children improve their reading skills. With the support of the community and the involvement and attention of parents and volunteers, children's self esteem is increasing and their reading skills are improving.

Throughout the mountains of West Virginia, homes need constant care and attention. My colleagues know that floods, violent storms, and other uncontrollable factors can cause homes to deteriorate more rapidly. My State is

fortunate enough to have organizations like the Southern Appalachian Labor School, Fayette Environmentally Safe Housing, and Americorps volunteers to repair and remodel homes for low income families. With project partners and community support, West Virginia families may live in a safe, clean environment.

Another Americorps program, Project HEALTH [Health Education Associates Learning to Teach Health], encourages healthy diets and lifestyles while increasing public awareness on health issues. Through a learn and serve america higher education grant, Project HEALTH and Americorps volunteers have a profound impact on rural communities. As a result of their hard work, communities have reduced illnesses and injuries, increased immunizations for children, improved the diets for high risk individuals, and reduced the number of low birth weight babies.

While working class families struggle to find adequate child care and affordable health insurance, the cost of living rises. Parents must provide more than the basic needs for their families. However, with the aid of the Regional Family Resource Network and Americorps, these services become a reality. Immunizations, developmental screening, and after school services are available to families in Kanawha, Clay, and Boone counties in West Virginia. Preventive medicine, medical attention, and a safe environment for children after school are vital to raising healthy children.

To help victims of domestic violence, the West Virginia Coalition Against Domestic Violence provides food and shelter, legal assistance, support, and counseling. With the assistance of Americorps volunteers, there are programs in Beckley, Charleston, Elkins, Huntington, Keyser, Lewisburg, Morgantown, Sutton, Welch, Wheeling, and Williamson. Emergency hot lines, resources, and counseling services are offered by the coalition also. Educating women about the warning signals and teaching them ways to avoid violent situations can prevent abusive behavior and possibly death. In West Virginia, there are twelve shelters providing services to victims.

Finally, I'd like to thank all the volunteers and employees who dedicate their lives to public service, and I'd like to thank the community for their support and involvement in Americorps projects. Your time and effort are greatly appreciated by all. With your help, our state has been able to improve the quality of life for West Virginians and to increase the opportunities for them in the future.●

RETIREMENT OF DR. RICHARD LESHNER FROM THE U.S. CHAMBER OF COMMERCE

● Mr. BROWNBACK. Mr. President, I rise today to pay tribute to Dr. Richard Leshner the retiring president of the

U.S. Chamber of Commerce. Dr. Leshner, who was chosen as president of the Chamber in 1975 as served the Chamber with both pride and dignity for over 21 years. His service to the business community will be remembered.

During his tenure, Dr. Leshner helped the Chamber's membership to grow to include 215,000 business members, 3,000 local chambers of commerce and 1,200 trade and professional organizations. His work on behalf of the business community in promoting common sense reforms and tax cuts has benefitted the entire country.

Dr. Leshner has served the business community with true integrity.

I would like to take this opportunity to wish Dr. Leshner great success in his future endeavors. I know that he will continue to contribute his time and talent to his fellow man even in his retirement.●

SONY FEST '97

● Mrs. BOXER. Mr. President, I want to commend the Sony Technology Center as it celebrates 25 years of success and partnership in San Diego.

In honor of this milestone, Sony is holding a four-day gala, Sony Fest '97. Scheduled events include the grand opening of the Technology Center's newest building (nicknamed "genesis"), a keynote address by Sony Corporation President Nobuyuki Idei, business and technical symposiums, even carnival activities for children and families. Sony Fest '97 promises to be quite a party!

Sony began in San Diego by constructing a color television assembly plant in 1972, making it the first Japanese electronics company to establish television production in the United States. Sony has been going full steam ahead in San Diego ever since. Today, 25 million television picture tubes, 14 million "Made in San Diego" televisions, and almost \$500 million in capital investments later, Sony continues to explore new horizons. It now manufactures a variety of electronic products from its trademark Trinitron televisions to computer picture tubes and peripherals. In fact, Sony San Diego is currently the only U.S. manufacturer of Computer cathode ray tubes or CRTs.

Although an international company, Sony takes pride in its efforts to respond to local and national concerns. Where possible, Sony buys and sells domestically, if not locally. For example, Sony estimates that 90 percent of the materials used in its television picture tubes come from domestic sources, and that 80 percent of finished Trinitron sets manufactured in North America are sold in the U.S. Sony San Diego is also very active in the community and in the fight for more environmentally friendly business practices.

I think all in San Diego would agree: Sony is a great neighbor. For 25 years its presence has helped make San

Diego a better place to live, work and conduct business. It is a pleasure to come to the Senate today and wish all involved a very enjoyable Sony Fest '97.●

TRIBUTE TO OUTSTANDING SENATE STAFFER BYRA KITE

● Mr. THOMAS. Mr. President, I rise today to pay tribute to a man who has dedicated his time, efforts and immeasurable talents to Wyoming politics. I am speaking of Byra Kite, whom I have known and respected for many years, and have had the pleasure of having as a member of my staff since I joined the Senate in 1994.

Byra is retiring, and I would like to take this time to publicly thank him for all his hard work. He has served Wyoming well, and I am not alone in saying he is one of our State's finest sons.

In 1965, Byra came to the Cowboy State from California to play football for the University of Wyoming. During that time, he was an All-Conference and All-American member of three conference champion teams, including the undefeated 1967 Cowboy team that played in the Sugar Bowl. Later this year, that team will be inducted into the University of Wyoming Hall of Fame. Following graduation he decided to stay in Wyoming. In Laramie he found his home, and his passion for politics.

He made his first foray into the national political arena in 1976 when he managed Malcolm Wallop's initial run for the Senate. Malcolm won, defeating a three term incumbent senator, and Byra began a 20 year career of helping Wyoming Republicans shape their campaigns and win elections. His tireless work, dedication and vision broke new ground in terms of modern campaigning.

In 1977 Byra began 18 years of service as Senator Wallop's State Director. During that time he helped hundreds of Wyoming folks in their dealings with the federal government. Following Malcolm's retirement, Byra joined our staff, and continued his outstanding brand of public service to Wyoming people. He, and his talents, will truly be missed.

And so, Mr. President, I am joined by Senators Wallop, Simpson, ENZI and Representative BARBARA CUBIN—all of whom have been touched by Byra's hard work and dedication—in saying not only thank you, but good luck to a trusted advisor and friend.●

TRIBUTE TO WALT DIBBLE

● Mr. DODD. Mr. President, for most Americans, mornings are a time of routines. People like to eat the same thing for breakfast, drink their coffee with just the right amount of cream and sugar, and duck out the door at the same time every day. Over the past 40 years, a central part of the morning routine for thousands of Connecticut
